If a deadkey is typed twice, it will produce its original value (If you type a semicolon two times you will get a semicolon).

Deadkeys may be combined to get double diacritics.

; plus ' plus a will give you á

' plus ; plus a will also give you á

One high tone is the deadkey for acute

Two high tones is the alphabetic apostrophe

Three high tones gives you the standard keyboard character

; plus q gives you “a”

; plus ; plus q gives you “a”

three ; ‘s gives you a semicolon

There are other keyboards available for odd and dotted vowels.
