Thank you. Also If I need any fonts then please send those... If you are using Unicode I don't think I need the fonts.

Hi Hugh,
Thanks for your e-mail, I can send this to you, I will play with the text a bit to see if I can send it to you as .txt file otherwise I will send as a word doc.

Wilf

Wilf,

I hope that you and the family are doing well. I got the last update. pictures are good.

I have been giving some more thought to some of the things we talked about the keyboard we designed. (talking to people at NRSI and such.)

I am wondering if you might be able email me the epistle of James in Chinantec. I want to count how many key strokes it will take to type the first chapter. I also designed a keyboard for Me'phaa and Mark sent me a copy of his book of James. So I would like to compare similar amounts of text. And then show the difficulty of typing in indigenous languages with the keyboard inputs methods we currently have. I would like to compare Spanish, English, Me'phaa and Chinantec. Mark was able to export the text from his translation project and send it to me as a .txt file. Does this sound like something easy for you to be able to send to me? Let me know if this is a no-can-do or if this passage does not exist.
